

Wisconsin Lions Camp

Health Care Information

Youth with Diabetes

Our Health Lodge and our Healthcare Staff are ready to make sure your camper stays healthy for all non-diabetes care during their stay at Camp! Our team consists of at least two Licensed Healthcare Staff who stay for the week, 2-3 Healthcare Specialists who assist the licensed staff, 1-2 Nursing Students from UW Madison and our Healthcare Supervisor, Amanda Dehli. During these two sessions, we add three Lead Medical Staff and at least one cabin medical staff per unit to assist campers with their diabetes management- which means we have at least 15 licensed medical staff on Camp property each week.

- **General Information:**

- The Health Lodge is open from 7 am – 10 pm with a Licensed Healthcare Staff on call each night from 10 pm – 7 am for illness or injury. Lead medical staff and cabin medical staff rotate around with campers throughout the day to all activities and meals, then specific lead and cabin medical staff are assigned on call each night.
- All diabetes equipment is stored in each cabin lounge. Campers have their own personal drawer for supplies. All other non-diabetes medications are stored in the health lodge for administration.
- Medication administration times are scheduled around meals and the camp schedule. Regular times are 8 am, noon, 5:45 pm and 8:30 pm.
- In emergencies, we are served by Rosholt Area First Responders and Stevens Point ambulance service with paramedics. We have several staff who are First Responders. The hospital we use is Aspirus Stevens Point and our Medical Director, who works with us to approve our healthcare standing orders, policies and procedures, is Dr. Trina Daniels, who is the Medical Director of the Emergency Room at Aspirus Stevens Point.
- If your camper experiences a fever, vomiting, diarrhea or other symptoms of a contagious disease within 72 hours of Camp time, please notify us immediately to discuss camp attendance.
- If your camper experiences a fever, vomiting or diarrhea that lasts more than 12 hours here, we will send them home from Camp.
- We strongly encourage your camper to bring a labeled, reusable water bottle, sunscreen and bug spray to have to Camp to stay hydrated and be protected from the sun and bugs.
- The Wisconsin Lions Camp does not carry any type of medical insurance for our campers. You are responsible for any and all medical costs incurred for any urgent care or emergency room treatment while at Camp.

- **Required Forms:**

The following forms **must** be at Camp by May 22, 2026 (session one) or May 29, 2026 (session two). **We will cancel any camper who does not have their forms in by the deadline.**

- A health history form, to be filled out by the guardian annually for up-to-date health information. This is automatically sent to you via email or by mail six weeks prior to your camper's attendance to ensure your health information is up-to-date for Camp.
- A physical examination form, based on an exam dated after August 2, 2024 filled out by a licensed MD, PA or NP must be on file. Your last physical date is in your confirmation email or letter. Physical exams are good for 24 months. The physical examination form is a general examination to ensure campers are healthy for Camp. We are happy to fax the physical form to your provider and have them fax the completed form back to us. You'll need to call your provider to get their fax number and call Michelle in the office with that number to get that process going. Physicals must be faxed or mailed to us; we are unable to upload them into our camper database.
- All follow-up forms such as seizure, mental health concerns, anaphylaxis allergy or asthma questionnaires need to be filled out to give us detailed information about the condition as well as educate staff on how best to care for your camper at Camp.
- A waiver form, to grant permission for medical treatment and care.
- You and your camper will bring with you the check in form that is sent to you two weeks prior to Camp to share up-to-date diabetes management information for the cabin medical staff.

- **Pre-Camp Calls:**

- Our Licensed Healthcare Staff will call you during the week prior to Camp to update your camper's non-diabetes health information and ensure we have everything to care for your camper in the Health Lodge. This helps speed up check in at registration.

- **Prescription Medication:**

- Please turn in all non-diabetes prescription medications to the Health Lodge. All medications must be in the original container with prescription label with your camper's name, dosage and times clearly stated. If any information is missing, or the dosing was changed without updating the prescription label, we cannot administer that medication.
- Please consider which medications are necessary for the week your camper is at Camp and plan accordingly by only bringing what is needed plus one or two extra.
- Please see the diabetes equipment packing list for what to bring specifically for your camper's diabetes management.

- **Vitamins and Supplements:**
 - Vitamins and supplements are accepted in the Health Lodge. They must be in their original containers with your camper's first and last name clearly written on the bottle.
 - We cannot administer any supplements that contain any CBD, THC or essential oils products.

- **Over the Counter Medications:**
 - We carry a variety of common over the counter medications for the occasional need. If your camper takes over-the-counter medication daily (for example, Claritin for allergies) you will need to bring your own supply.

- **Non-Diabetes Medical Equipment:**
 - For any non-diabetes medical equipment your camper may use, such as CPAP machines, please make sure your camper has everything they need. Camp does not have any extra chargers, face/nose masks, power cords or distilled water. Please make sure you have everything you need. If your camper will need assistance with the medical device, our weekly health lodge staff will ask you to walk us through how the device works, common troubleshooting, and ask who to contact if there are problems

- **Phone Calls Home:** For non-diabetes care calls, our Health Lodge staff will contact you while our lead medical staff will contact you for diabetes care issues:
 - To consult you for further medical information.
 - Any care needing an out-of-camp appointment.
 - Any medical emergency where 9-1-1 is called.
 - Any equipment failure (pumps, CGM sensors).
 - Any major diabetes management issues that are unable to be solved by the lead medical staff
 - An illness that lasts for more than 4-6 hours. Illnesses over 12 hours require a camper to be sent home.
 - Any non-compliant behavior around health care, such as a refusal to take medications or treat medical condition.
 - Other medical situations or symptoms that you, the parent/guardian, would like us to contact you for should they occur.

- **Questions?**
 - Contact our Healthcare Supervisor Amanda Dehli.
 - Email: adehli@wisconsinlionscamp.com
 - Phone: 715-677-4969 ext. 334
